Lower Basin Drought Contingency Plan Arizona Implementation Steering Committee Meeting #6

October 25, 2018

Steering Committee Members and Alternates,

The Thursday, October 25th Drought Contingency Plan Steering Committee meeting has been cancelled to give time for additional discussions and analysis related to the four essential elements involved in this process including mitigation, Arizona Tribal ICS, excess water and an Arizona Conservation Plan.

Progress is being made through discussions with various stakeholder groups, including Steering Committee delegates, which we believe will lead to Arizona's Drought Contingency Plan. The goal remains to complete the plan by the end of November.

The remaining two public Steering Committee meetings will be held November 8th and November 29th at the CAP Headquarters.
